Town Council Met in Regular Session Monday

Question of the Town Electric Power was Asked

Town Council met in regular session last Monday evening with Mayor Slinger in the chair and councillors Shaw, Buchholz, Hope and Rinaldi present.

Very little business was up for discussion.

Mr A. H. Goyne appeared before the council and gave notice of a petition for a street which was asked for tenders in the Revue.

Mr Bailey was present and asked for reasons, he was discharged from town work. The Mayor explained that the matter of engaging and discharging town employees was left to the town foreman and the town pump station engineer, in these departments.

The relief provincial department wrote council instructing that council pay the city of Calgary for relief allowed to a former Redcliff citizen while he was in Calgary. The Mayor was referred to solicitor Baird for reply.

Accounts as passed by the finance committee were approved for payment.

Mr Kitchin applied for two week's holidays. The request was granted and Mr W. Chapman was appointed to fill the vacancy during his absence.

The question was asked as to what developments were made in connection with having electric power throughout the town. It was the opinion of council that further development was up to the Medicine Hat council as the town council had specified certain agreements in the contract.

Moratorium May Close Alberta Banks

This is Opinion of One of The Bank Officials

Officials of Canadian Banks are of the opinion that control by the province of the banks operating in Alberta would be impractical from the bank's point of view.

One official's remark was: "If the legislation is such as to make it impossible for us to carry on in the province, there is only one thing for us to do—withdraw our banks."

Local Legion Held Service at Cemetery

Decorated Graves of Comrades Who Passed Away

Decoration Day was observed by the local Legion last Sunday afternoon, but there was a very small turnout.

Service was conducted at the cemetery by Rev. Bucher, of Medicine Hat, and after the service the graves of eight returned men who had passed away were decorated with sprays.

In his remarks at the service Mr. Bucher said:

"In the presence of the last remains of this our loyal and true Comrade, whose loss we mourn, but whose spirit and example still survive, may we as veterans and citizens be charged with the full sense of our duties and responsibilities and may we ever strive to uphold those principles of unselfish service which actuated our Comrade and Brother. I call upon you to stand with bowed heads in silence for the space of one minute out of love and respect for him who has answered the last roll call."

Visitors Praised Bread Made in Redcliff

Was of Opinion That Citizens Should Support It

A few days ago we had a visitor and while at lunch he remarked that very fine bread was made in Redcliff.

When the conversation was carried on the visitor remarked that he was surprised to see it at other places of bread from outside were handled here.

He was of the opinion that when such quality of bread was made in town every household should support the local baker as well as every line of business represented in ones own town.

Any live town, he said, is a live town because its people help each other.

"The use of state money is the only solution to the money problem," was stated by Hon. J. L. Shaw, provincial treasurer. The minister extended that if it were possible to use state money everywhere, then it should be possible to do the same in Alberta.

Class Blowers Hold Their Annual Picnic

Was Held At The River Just South of Town

Local Glass Blowers Union held their annual picnic at the south of town last Sunday afternoon.

There was a good attendance and arrangements were made for the entertainment of men, women and children.

Refreshments were served during the afternoon and in the evening all joined in a splendid picnic supper.

A program of sports of various kinds was conducted and lots of fun was provided.

The event was most successful and all thoroughly enjoyed the outing.

Mr. Len Hicks arrived in town last evening to visit Mrs. Hicks.

At a meeting of St. Mary's Altar Society held yesterday arrangements were made to hold a social supper in Cliff Hall on Monday Oct. 11th. Keep this in mind.

Local reports are to the effect that arrangements are well under way for the glass blowers to return to work in the Dominion Glass factory in the near future. It is hoped by all that satisfactory plans will be made as soon as possible.

A commission of five members has been appointed by the federal parliament to study Canadian economies giving particular attention to the financial relation between the provinces and the Dominion.

Mr. M. Hatnick, who has a fine vegetable garden south of town has a wonderful crop of ripe tomatoes this year. They are grown in the open and have been ready for eating for the past few weeks, and are of a fine size and quality.

Hon. W. N. Crant, former minister of agriculture in the Alberta cabinet, announced yesterday that he would no longer support the government and in future he would be an independent member.

He charged that the government was adopting an open, unethical and in direct conflict with those of the other eight provinces who would be in the assumption of confederation.

LOOK AT YOUR LABEL

Local School is Ready For Open September 1st

School Nearly Renovated During The Summer Holidays

The elementary intermediate and high schools are ready for the fall term on Wednesday Sept. 1st.

New Blackboards, varnished desks, elevated radiators, polished floors, new desk-top furniture, new centers, new library books, new teaching and new canvas of state of each of the schools, the hall and the assembly room—220 new framed linoleums.

Miss Kime of Library has been engaged to replace Miss Jean Moore. She will also teach music lessons up to grade ten. The vacancy caused by the resignation of Mr. C. G. Fow will be filled as the school will operate with seven teachers of eight teachers as formerly.

The new high school arrangements are in effect to make ten this year as that students in this grade will be relieved of our final examinations. The only compulsory units in the new high school course are English, Social Studies, Health and P. E. After that students may choose what subjects they wish. The artists may draw, the singers may sing and the actors may act.

Last year grade nine students who received diplomas will be allowed to take an unrestricted course. All others who received B or C grade standing will be allowed to proceed with the work of Grade X providing they do not select the old academic subjects such as algebra, geometry, physics and chemistry.

Under the new course of study the majority of text book are provided for the pupils.

After school opening itself and the meeting of old friends, interest will soon settle down to the fall term meeting which is held annually the end of September.

An interesting social will be held at Mrs. Hurlbert's residence, 1st Monday afternoon Sept. 1st. So far this month over 300 under the auspices of St. Mary's passing through have visited Altar Society. All are invited the plant.

Holidays starting through the Dominion Glass held here and have been most interested in the good turned out. All are greatly surprised at the large size of the plant and the 200 hands employed.

At the large size of the plant and the 200 hands employed, 1st Monday afternoon Sept. 1st. So far this month over 300 under the auspices of St. Mary's passing through have visited Altar Society. All are invited the plant.

Fred Walker's Barn Burned to the Ground

Supposed to be Started From New Street Clover

Mr. Fred Walker's barn and chicken house in the Box Spring district were burned to the ground last Sunday about midnight. The reflection was seen to glow by several citizens who were returning home.

Mr. Walker was ready when awakened by the barking of the dog and saw the barn burning. Fortunately they had time to remove the two valuable stallions from the barn but the harness and all farm equipment was a complete loss. The chickens were also lost before the barn house caught fire.

The origin of the fire is unknown but Mr. Walker is of the opinion that new sweet clover which he had recently stored in the hay mow, had caused spontaneous combustion.

There was no insurance on the buildings or equipment.

Rust Proof Wheat Provided For 1938

Supply is Available for Sale To The Farmers

Farmers from all over the province of Manitoba are inquiring from the department of agriculture the terms on which they will be able to secure a supply of rust resistant Thresher 3 or C grade seedling.

The government is understood, is taking steps to see that a supply of this wheat is available for seed, and the department of agriculture is asking the co-operation of municipalities and line elevators to encourage distribution.

Holidays starting through the Dominion Glass held here and have been most interested in the good turned out. All are greatly surprised at the large size of the plant and the 200 hands employed.

Local Gun Club Was Organized Last Evening

Officers Elected to Prepare Plans For The Future

At a meeting held in the Legion Club-room last evening it was decided to form a local gun club. There was a group of ten who are the following officers were elected:

President: J. Allenbeck; Vice: Fred J. Polak; Sec: Frank Moore; Treasurer: E. J. Conroy; Messrs G. Ostry, E. Moore, R. McKay and J. Hop.

The officers will at once make arrangements for grounds and equipment and canvas for members. They will then call on the members in the near future to complete plans for the future. Those wishing to join should notify the officials.

S. C. member of the Legislature for Lehigh, H. E. Wright, indicated he would shortly resign as a member of the legislature.

Empire Flying Boats Ready For Trans-Atlantic Trials

The giant Empire Flying Boats built by Imperial Airways for services between distant parts of the British Empire, are ready to undergo test flights across the Atlantic Ocean, and the first flight made early in July. Above the picture is "Empire", one of the flying boats, which meet in a machine testing one of the new type life boats with which all these huge flying boats are equipped. These new life-boats are special cushions which form the backbone of the passenger deck. They weigh only five pounds, can be easily changed into life-boats, and can support a weight of 250 pounds indefinitely in the water.

Confidence Restored

The recent announcement of Prime Minister Neville Chamberlain and Foreign Secretary Anthony Eden of Great Britain's intention to face the responsibilities by rearming as speedily as possible and to such an extent that "nobody dare treat her with anything but respect" will fall on many receptive and welcoming ears, not only within Great Britain and the Empire but in other countries who look to Britain for leadership in the task of preserving the democratic form of government.

There is no question but that Britain has "lost face," to use an Oriental expression, during the past two or three years, because of her failure to take a stand in the councils of the League of Nations strong enough to prevent the rights of member nations being violated.

Representative newspaper and magazine writers in some of the smaller democratic countries of Europe, such as the Scandinavian group, who have been wont to look to Britain for leadership and who, at any rate in recent years, have been strong friends of Great Britain and, in the past year or two, have been disappointed at the situation and have more particularly have expressed criticism over the Ethiopian debacle.

But there was a very good reason why Britain could not go further than she did in attempts to enforce sanctions against Italy as the violator of Abyssinia. No one knew better than the British representatives on the councils of the League that if coercive measures were needed to prevent depredation of the northern African kingdom she was not in a position to ensure that these methods were carried out.

The British war machine, and particularly the aerial arm of it, had been allowed to become obsolete and no efforts had been made to bring it up to date; or, conversely, it might be more correct to say that other and more intelligent nations had built up huge destructive forces and little or nothing had been done by Britain to keep pace with their activities.

Under these circumstances it would have been futile for Britain to have displayed a flag which was not heavily manned or to have uttered threats which she could not carry out. She did not want to start something she knew that she could not finish. Hence, relying more could be expeditiously done than advice and negotiate, in the knowledge that anything more forceful might precipitate a disaster which the great majority of nations hoped to avoid. It was a policy of prudence and that was the only policy that could safely be adopted at the time.

Now, however, that it is to be changed. Great Britain has already commenced an active and ambitious program of rearmament, which, in a year or two at the outside, will enable her to resume her role as leader of the European and world democracies in the full knowledge and certainty that the utterances and decisions of her representatives will be respected by even the most powerful and belligerent of nations.

The general objective of the program was aptly expressed by Prime Minister Chamberlain when he told his constituents that it was the aim to make Britain so strong that "nobody dare treat her with anything but respect" and his additional announcement that he faced his responsibilities "without fear or hesitation" will inspire confidence not only in Britain but in many other countries who are genuinely anxious to preserve world peace, as is Britain herself.

Confidence will be further fortified by the supplemental declaration of Mr. Anthony Eden that Britain will be availing itself of the opportunity of the territorial integrity of Spain and the maintenance of the Mediterranean as a main arterial road for the flags of all nations.

Both these objectives have been and will be availed of as the work in Spain progresses. The dismemberment and even the potential demoralization of Spain would undoubtedly precipitate a general conflagration in which all the European countries might ultimately become involved and that is what the majority of the non-belligerent nations of Europe fear so much to-day.

Despite the declarations of individual visitors from Europe to this continent in the effect to make it impossible to avoid the general war which is now being waged on both sides of the Atlantic that the trend of events in Spain, coupled with a great deal of outside interference, constitute a grave danger to the peace of Europe and perhaps of the world.

A strong and well-armed Britain, with no ulterior motive to serve, will go a long way to allay such alarms and will do much to ensure peace in Europe and security for the democratic countries of that continent.

Something New To Try

According to the Christian Science Monitor, to Hattie Trevelly, the Regent editor, a woman once wrote: "Our church is in dire financial straits. We have tried every device to get going—fairs, street-vending, festive, poster supplies, a dunky party, trout baskets, Japanese wedding, mock marriage, and beer and bottle sales. I am sure you have tried them all. Will you please tell us, Mr. Greeley, what we can do to keep our struggling church from dissolving?"

Stars Annual Paid

The N. B. McLean, the biggest unit of the government interlocking group has pulled out from here on her annual \$500,000-nile in Hudson Bay and street. The ship, the Capt. W. J. Balcom, formerly of Halifax, will be away until October.

Visitor: "Your son is rather small for his age, isn't he?"

Friend Mother: "Oh, no; most boys of his age are overgrown, I think."

Italy used nearly half 3,000 years ago.

BLACKHEADS

Don't sneeze at blackheads—snuff out the eyes of most hideous blemishes. They are caused by dirt and grease on the face, which, when rubbed in, clog the pores. They are caused by dirt and grease on the face, which, when rubbed in, clog the pores. They are caused by dirt and grease on the face, which, when rubbed in, clog the pores.

In comparison with human eyes, the eyes of most birds are telescopic. A small grain particle hardly distinguished by a person, stands 100 yards away from it, is seen 100 yards away from it.

Multiplicity Of Duties

Royal Canadian Mounted in Northwest Territories Rept-Bay

Wherever the scientist, explorer, prospector and surveyor goes in the Northwest Territories he finds the Royal Canadian Mounted Police. They represent just about a dozen kinds of officials.

The government statement dealing with the Northwest Territories discloses the information that "the execution of lawlessness and apprehension of offenders are but a few of the multiplicity of duties performed by members of the force."

They are entrusted also with enforcement of the Northwest Game Act, the Migratory Birds Convention Act and various other Dominion acts.

In certain circumstances they are asked to assume customs and immigration duties, to collect income taxes, accept applications for naturalization, act as postmasters, mining recorders or coroners, to issue liquor permits, pass wolf and coyote bounties, register vital statistics, issue licences to distilleries, Eskimos and Indians and supervise liquor permits and importation of liquor.

All countries have a few of these duties of the peace and all ranks are commissioners for administering justice. Sheriff of the Northwest Territories is Major-General Sir James H. Macbride, commissioner of the R.C.M.P.

The force has men at 22 points along the Mackenzie basin they are stationed at Resolution, Providence, Simpson, Norman, Good Hope, Arctic River, Maitland and Alkath. Scattered along the Arctic shore are posts at Colville, Cambridge Bay, Cameron Bay, Fort Rae and on the patrol boat "88. Rocco."

Prince Charles Of Sweden Marries Countess Elsa of Rosen.

A Communion

Prince Charles of Sweden sacrificed any chance of inheriting the throne when he married Countess Elsa von Rosen, a commoner.

The nephew of King Gustaf V. of Sweden and brother of the late Queen Astrid of the Belgians, lost his title and prerogative in the Swedish royal family.

He acquired a new title, however, by royal decree Prince Charles, Bernadotte, heir, the daughter of the Swedish court master of ceremonies, became Princess Elsa.

Prince Charles was the third member of the Swedish royal family in recent years to forfeit his crown rights for love.

The new prince, seven years older than his 26-year-old husband, was divorced in 1925 from M. Agnes von Rosen. She has three children.

Lonely Island Was Safer

Civilization Proved Too Much For Boy From Tristan da Cunha

Tristan da Cunha, a small island in the South Atlantic, more than a century ago.

Donald left a happy life, where disease is virtually unknown, determined to live in the great world. He was accepted by the Boy Scouts who, tried to make life for him something like that in the home from where he came, but they failed to consider the gods that afflict civilization. He felt ill and gradually declined.

From 1901 to 1905, these two shelters have distributed 700,000 in the three prairie provinces over 150 million tons.

"I am grateful to you for the confidence you have reposed in me," stated the winning candidate.

"All right," said a voter in the rear, "but don't do any more repeating. Get busy."

It takes four to eight times as much soap to make a satisfactory cleansing lather when hard water is used than when soft water is available, depending on the degree of hardness of the water.

In comparison with human eyes, the eyes of most birds are telescopic. A small grain particle hardly distinguished by a person, stands 100 yards away from it, is seen 100 yards away from it.

Job Was Through

Crude Operation By Amateur Surgeon Probably Saved Man's Life

A crude operation performed with a knife and a saw, and the needle appeared to have saved the life of a man badly torn by a rusty spike on his leg.

Dr. D. H. Brown, a local physician, was called to the scene of the accident. He found the man lying on his back, his leg badly lacerated. He immediately began to work.

Brooks, a leader of the wilderness, was in the Chase, a small village of Southern California, slipped while repairing a wheel two weeks ago and a spike ripped a gaping wound in his thigh.

San Miguel is without a doctor, a hotel, or any means of communication with the mainland. No ship was due for weeks.

Realizing that Brooks would bleed to death unless he was operated on, Dr. Brown, a local physician, was called to the scene of the accident. He found the man lying on his back, his leg badly lacerated. He immediately began to work.

He found a 24-inch and the needle appeared to have saved the life of a man badly torn by a rusty spike on his leg.

For twelve days in passing camp he had his doctors signal. The American flag flying upside down. Then the motorcade vacated of Brooks arrived four days ahead of time with supplies. It rushed Brooks ashore.

Physicians at Colgate Hospital said the amateur surgeon was so thorough that no infection developed.

Selling Canada's Wheat

Publicity Campaign In Britain Planned With Care

The Canadian Wheat Board sends a brochure containing handsome reproductions of the material used in its United Kingdom advertising campaign.

The board says that so far as it knows this was "the first attempt which has been made by any wheat-exporting country to promote the sale of wheat by advertising and publicity work."

The campaign was planned with great care. Advertisements designed for their respective fields were used in the newspapers of England, Scotland, Northern Ireland, emphasizing the advantages of Canadian hard wheat in the making of bread.

At the same time a series of advertisements in trade journals was addressed to millers, bakers and restaurants.

The Canadian Wheat Board is dealing with a product of unexcelled quality, trying to increase its sale in the rich and concentrated market of the United Kingdom, and its campaign appears equal to the occasion.

Prison Journal

Man Found His Neighbourly Act Cost Him Poverty

It cost George Thomas of Monro, Sask., just \$25 to be a good neighbor. He undertook to transport the band from this town, 25 miles northeast of Monro, to the town of Yorkton.

His good turn but he had done his good turn he met up with the law. He was fined in the Royal Canadian Mounted Police court for carrying passengers in a truck.

A motorist driving 45 miles an hour steadily for 19 hours a day would require 13 years, 10 months, and 21 days to travel over all the improved roads of the United States.

From here it is beginning to appear that trying to get rid of rice is much like trying to throw away a bit of chewing gum, says Judge.

Hamburg, Germany, has a population of more than 1,120,000.

Festival Date Changed

Set Back One Month When Delegates Met At Moose Jaw

Dates for the 1938 provincial music festival were set back a month as delegates from five provinces concluded the 12th annual conference of the Western Canadian Music Festival Association at Moose Jaw. Next year the Saskatchewan festival at Saskatoon and Regina will take place the latter part of April, from April 25-30. At present, no definite arrangement has been made as to whether Regina or Saskatoon will conduct its festival first. So far, the all arrangement will be followed, whereby in 1938 Regina will be first, Saskatoon second.

In 1937, the festival took place during the last week in May. Delegates were present from Saskatchewan, Manitoba, Alberta, British Columbia and Quebec.

Represented for the first time at the conference was the Quebec Musical Competition festival which held its festival this year in Montreal. The organization was represented by R. Wills, Montreal.

Adjustments for 1938 will be Sir Hugh Robertson, Glasgow, Scotland, who will adjudicate choral and vocal competitions; Maurice Jacobson, London, instrumental and choral adjudicator, and Stewart Wylie, Vancouver, who will also adjudicate vocal competitions.

Mr. Wilson is now in Canada, but Sir Hugh Robertson has been in the Dominion on several occasions at the request of Mr. Jacobson.

In 1938, the same three adjudicators who recently completed their tour of Canada's festivals will return: Dr. J. F. St. John, George Dods, and Arthur Benjamin. Dates for festivals both in 1938 and 1939 were set recently, as delegates pushed through in completion in two days a series of resolutions.

SELECTED RECIPES

PICKLE RELISH
2 qts. cucumbers
2 qts. onions
1 large cauliflower or cabbage
3 peppers, red or green
1 gallon mild vinegar
6 cups brown sugar
2 cups Crown Brand Corn Syrup
1 cup Henman's Corn Starch
1 cup mustard
1 teaspoon turmeric powder
2 oz. mustard seed

Method: Chop all vegetables fine. Let stand in brine overnight (1 cup salt to each quart container). Drain. Make a syrup of vinegar (reserving 1 cup for dressing), sugar and spices. Boil for 10 minutes. Make a dressing of Henman's Corn Starch, egg yolks, and oil. Add cold vinegar and hot brine mixture. Add to the bowl; seal in sterilized jars. Makes 5 pints.

Has Successful Year
Canada's Fishing Industry Shaved Big Increase In 1936
Canada's fisheries in 1936 experienced the most successful year since 1929, the Dominion reported.

Value of production in 1936 was \$26,146,618, the total representing a value of fish as marketed whether sold for consumption fresh or as canned, smoked, dried and salted. It showed an increase over 1935, last year of the depression period, of \$12,500,000 or 31 per cent.

The quantity of fish marketed by Canadian fishermen during 1936 was 11,088,279 cwt., with a value at the point of landing of \$22,083,745, compared with a catch of 9,523,618 cwt. and a value of \$20,765,787 in 1935.

Easy To Identify
When the police of Hermanus, South Africa, suspected the trail of a "baited" burglar, who had stolen \$100, the Sheriff's Office instantly told them the capture should be made. One of the big loss was peculiarly formed. All the well-known jail characters passed inspection, and the trail finally led to N. C. Ogden, an amateur burglar, who was sentenced to four months' hard labor.

Left Legacy For Poor

But Ties In Scotland His No People Who Qualify

There is a small town in Aberdeenshire, Scotland, called Turf, with a population of over 2,000, who are a very proud people. That is not to say they are conceited, or affect a lofty attitude toward other communities. The colloquial name for it is "Turf," and the locals have a slogan: "Take us Turf and ten miles round and what is left of the universe that is worth while." That's the sort of people who are in "Turf." They regard their town and environs and the people within it as the hub of humanity.

Turf has really justification to boast about. Recently a native of the town died in New Zealand and made a bequest of \$25,000 to the people of Turf. That is where the Town Council is in a pickle. There is no festival this year in Montreal. The organization was represented by R. Wills, Montreal.

Adjustments for 1938 will be Sir Hugh Robertson, Glasgow, Scotland, who will adjudicate choral and vocal competitions; Maurice Jacobson, London, instrumental and choral adjudicator, and Stewart Wylie, Vancouver, who will also adjudicate vocal competitions.

Many Factors Enter Into Establishment Of A Sound Plan Of Crop Insurance

Crop Insurance attempts in Saskatchewan had failed for several reasons, one of which was small capitalization and lack of adequate financial reserves of operating companies, stated Wilmer J. Hansen, of Ottawa, who addressed members of the Canadian Society of Technical Agriculturists at Saskatoon. Mr. Hansen reviewed the whole question of crop insurance as it was related to Saskatchewan.

It was significant, he said, that in the period 1915-1933, there were only three years, 1922, 1923 and 1925, when the average yield of wheat did not fall to five bushels per acre or less in any one municipality of the province. "Even in those years, it may be safely asserted that crop failure was experienced on an enormous number of individual farms," he said.

Many factors affecting the wheat crop in Saskatchewan which demanded consideration in insuring the crop. Some of these were soil and topography, chemical, physical and biological characteristics of the soil, texture, fertility of soil and moisture, tendency to soil erosion with respect to the drought area, climatic conditions, prevalence of plant disease, infestation by insects, rodents and insects, besides many farm procedure factors, including preparation of the seed bed, selection of seed varieties, the depth and rate of seeding, adequacy of farm power, weed control, insect control, rotation methods, use of fertilizers and so on.

The yield of wheat per acre was the result of the unpredictable combination of all the foregoing factors. During the last 20 years, Mr. Hansen said, the yield of wheat per acre had been a more important factor than the acreage needed in determining the total production used in the province.

During the period 1915-1933, 252,000 acres had been needed to produce the average yield per acre in excess of five bushels per acre as crop failures, approximately nine per cent, of the acreage needed to produce a bushel per acre, and four per cent, had produced bumper crops. "They are apparently the exception rather than the rule," the speaker said.

Several attempts at crop insurance had been made by insurance companies, the types including yield insurance (general crop coverage) cost of production or investment, minimum cash value, and loss on the truck garden and hail insurance.

The attempts at general crop insurance had failed because, (1) operations were restricted to a relatively small area, the entire territory of which was affected by drought. (2) The insurance contract covered price as well as yield, and prices took an unexpected drop. The data were insufficient upon which to base coverage and premium rates in order to avoid over insurance. (3) Inefficient management and lack of control over agents; writing of insurance late in the season when it was evident losses would be incurred, and (5) small capitalization and lack of adequate financial reserves on the part of the operating companies which would enable them to spread risks and conduct operations for a long period.

The problem of crop insurance was not that of averaging losses of the individual farmer from year to year, as it was one of averaging the losses over a period of years, the speaker declared. It was not a matter of spreading the income of a group of farmers as much as spreading the income of individual farmers over a period of years.

Yield insurance aimed at giving protection covering such uncontrollable hazards as drought, hail, wind, tempest, insect infestation, plant disease, flood, lightning and tornado. A 60 per cent. coverage of the long-term average yield of wheat would perform a reasonable service, the speaker believed.

He discussed the advisability of compulsory crop insurance, and drew the conclusion that a model compulsory crop insurance plan was desirable. Technical insurance matters, such as payment of premiums and the position of tax payments with respect to indemnities, were also discussed.

"Did you hear about Smith, the bank cashier? He's stolen fifty thousand dollars from his bank, and run off with his friend's wife."

"Good heavens! And who'll take his money?"

"Don't know."

Toads Eat Bats

And They Grow Their Legs In Hawaii

"Thebanian" is the latest discovery of American agricultural experts in their efforts to find destroyers of insects that attack crops. The toads, scientifically known as the Bufo marinus, first were introduced into the Hawaiian Islands a few years ago, where they proved extremely useful in eradicating all harmful insects on sugar plantations.

Since then, they have become sufficiently numerous to permit exportation, and the first foreign demand has come from the British colony in the Fiji Islands, where they again are given excellent results. They are now sufficient in numbers to permit of exportation to any country of the world that asks them. They are the largest toads known and can devour an amazing quantity of bugs.

New Gadgets

U.S. Patent Office Caters Up With Inventions

Inventions on which patents were granted by the U.S. Patent Office during the past month included the following:

A necktie constructed in telescoping sections so that it can be adjusted to any length.

A golf club with a drill in the top of the shaft for boring a hole in which to insert a wooden tee when the ground is hard.

A self-sharper with a retractable brush inside the cap for clearing the perforations of a racket ball.

A streamlined boat for golf clubs. A chestnut with a special compartment in the bottom for salt and pepper.

A machine for slicing mushrooms.

Now Honored By Nation

Chinese Obedience As Traitor Given New Name

Ma Hsiang-pao, 60-year-old state official who was impeached as a traitor 40 years ago because he fled to a lost in the United States after the overthrow of China, has moved into a new home in Nanjing.

Public funds of \$15,000 were raised to honor his great age and a new house was built. Ma was impeached for his alleged betrayal of the emperor who he had been the emperor's campaign of T'ai Hsi, emperor Dowager. A devout official, Ma, after his great age and continued vigor to his unwavering diet consisting of sweet milk, sweet biscuits, light French wine, chicken broth, poached eggs, orange juice and hot chocolate.

Study Quits

To Publish Results Of Psychological Study Carried Out By University

Why Canada's world-famous Dime quietists behave as the five healthy youngsters they are will be discussed in his next annual report, Dr. Allan Hay Dafon, their physician, said. The report will be published this fall. Results of a psychological study of the quints, carried out by University of Toronto experts under Dr. W. E. R. Dime, psychologist and educationist, are being compiled now. Findings of the experts were passed on to Dr. Dafon.

Good After Dinner Story

The death of the widow of Pett Ridge recalls the wonderful work he did for children in East London. A humorous writer, his hobby was child work. He was also a first-class after-dinner speaker. One of his best after-dinner stories was of a notice given by the mother of a child, one of the then new dance halls. This notice read: "The management have the right to refuse admission to any lady they think proper."

Manage Security

Lungfish Pagoda, which has stood for as the most noted landmark of Shanghai, has been mortgaged for \$200 by the bank of Lungfish Temple to a rice shop in a nearby village. The shop was embarrassed recently when he was asked to pay a large rice bill contracted by the temple, which has been insolvent for a long time, and he asked the proprietor of the store to take the pagoda as security.

"King George I. of England, could not speak the language of his own people."

"Don't know."

SMALLEST PONY AT INTERNATIONAL SHOW

'Above is the smallest shetland pony entered at the International Horse Show at Olympia, London. His charming mistress has no difficulty holding the little fellow by his front feet.

Rubber Trees Short Lived

Are Only Valuable Commercially For About 25 Years

A short time ago we learned a lot about tree plantations in India from J. M. Kilburn, of Assam, and then we took our second lesson in exporting rubber from the British Empire from Mr. Mrs. H. E. Spence, a charming English couple who have left their rubber plantation in Penang, Straits Settlement, for a trip to the Old Country. We were told that rubber, as it runs from the tree, looks like a harmless cup of milk, but it has a nasty trick of gumming up everything it touches. A couple of drops in your hair, for instance, will send you to the barber to be shaved "as bald as a baby. Rotatoes, shaved mostly by tappers from Sumatra, India, from 200 to 15,000 acres. Trees resemble our fir in size and live indefinitely. Their commercial life is about 25 to 30 years, but science is devising a system of grafting at the base of the trunk which plants hope will raise yearly production from 400 pounds an acre to two thousand. The milky sap (called latex) is hauled to the factory where it is stored in tanks, broken down with water and mixed with acid to coagulate. It is left overnight with aluminum salts in the tanks, so that in the morning the rubber has formed hard white disks. These are rolled to one-eighth-inch thickness and sent to the smoke house for two to five days until thoroughly dry and a beautiful amber brown in color. The product is then exported to manufacturers throughout the world who start to tear the sheets apart and make them into all over again. Mr. Spence has been on his plant for 27 years. When he first arrived he covered the estate on horseback, but now he uses a little two-seater car to go over his 2,000 acres—Torneo Telegram.

Weight has no influence on the velocity of falling bodies. An iron ball and a wooden ball, of equal size, will fall at the same rate of speed.

Passenger trips taken on British railways in a recent month numbered 99,919,912.

Combine Crochet and Cross Stitch

Household Arts Alice Brooks

The Persian water pipe (as known as a "hookah") smokes, it is drawn through a tube of water, by means of a long, flexible stem, or tube.

Use Them Together or Alone

PATTERN 5751

Here's a bit of simple "Addition" that adds up to something full of charm and color! Combine a border of crochet with a cross stitch motif that echoes the same dainty rose design, and you'll bring new beauty to scarves, towels, pillow cases or other items. If you prefer, use either the cross stitch or the crochet in a single or varied color. The pattern 5751 you will find in our pattern book, two motifs in a 12 inch square. It includes a chart and directions for a 10 inch square; material required: 1/2 lb. of No. 10 cotton yarn, 10 to 15 to 20 to 30 to 40 to 50 to 60 to 70 to 80 to 90 to 100 to 110 to 120 to 130 to 140 to 150 to 160 to 170 to 180 to 190 to 200 to 210 to 220 to 230 to 240 to 250 to 260 to 270 to 280 to 290 to 300 to 310 to 320 to 330 to 340 to 350 to 360 to 370 to 380 to 390 to 400 to 410 to 420 to 430 to 440 to 450 to 460 to 470 to 480 to 490 to 500 to 510 to 520 to 530 to 540 to 550 to 560 to 570 to 580 to 590 to 600 to 610 to 620 to 630 to 640 to 650 to 660 to 670 to 680 to 690 to 700 to 710 to 720 to 730 to 740 to 750 to 760 to 770 to 780 to 790 to 800 to 810 to 820 to 830 to 840 to 850 to 860 to 870 to 880 to 890 to 900 to 910 to 920 to 930 to 940 to 950 to 960 to 970 to 980 to 990 to TOWN OF REDCLIFF The Local Tax Arrears Consolidation Act

The Council of the Town of Redcliff has passed a By-law declaring that the above Act will be applicable to the Town of Redcliff and said By-law has been approved by the Minister of Municipal Affairs in writing.

All consolidated arrears of taxes shall under this Act be payable by five equal annual installments together with the current taxes on or before the 15th day of December except as hereinafter mentioned.

The following persons may make application to the Council to come under the provisions of the above Act.

Any person, firm or corporation who is the owner of any parcel of land in the Town of Redcliff, against the title of which, there is subsisting a lien for arrears under "The Tax Recovery Act 1929."

Any person who has been a bona fide resident of the Town of Redcliff for 12 months immediately preceding the date of his application in the case of lands which have been finally acquired by the Town of Redcliff.

Or all or such persons as personal representatives.

In such cases where the applicant's property is to be exposed for sale at the forthcoming Tax Sale on Sept. 15th, 1937, such applicants should make their applications in time for the Council to consider same previous to that date.

Upon receipt of the application, the Secretary Treasurer shall calculate the amount required to pay the arrears of taxes, if the same were consolidated, and the applicant shall deposit with the Secretary Treasurer one fifth of such sum.

In such cases where the applicant to consolidate is made after the 5th day of November 1937 the applicant shall also deposit with the Secretary Treasurer sufficient to pay the current year's taxes.

In any event, the current

year's taxes shall be paid by the applicant on or before the 15th day of December.

When the application is granted, the deposit shall be applied on the applicant's consolidated arrears, otherwise it shall be repaid to him.

In case the application is not granted, provision is made in said Act for an appeal to the Minister of Municipal Affairs.

No buildings, fences, fixtures or other improvements shall be removed from any land in respect to which there is a subsisting or consolidation agreement.

To those who properly come under the provisions of the above Act, all proceedings under the Tax Recovery Act 1929 are suspended in respect to the properties involved while such consolidation agreement is in force.

About Handwriting

Famously Becoming A Declining Art From One Of The Typeset

Handwriting, according to a Cape Town educationist, is a declining art. In 50 years time, he declares, it will be lost altogether. Many people, with better experience of the things they receive from friends, will consider this a generous estimate. They believe, not without justification, that even in the narrow circle of their acquaintances, handwriting is already dead. Who has not spent a weary quarter-of-an-hour, torn between impatience and curiosity, in an effort to decipher a scrawl in which "a's and n's, u's and f's are confounded in a glorious incoherence"? It is a common experience that the slightest increase with the importance of the communication. Emotion expresses itself only too obviously in erratic writing, though it is true that a rejected lover, with a sense of the dignity required by the occasion, might take pains to make his last farewell in characters clear and pertinent. They must stand of necessity with a quick. The well-known Warden of an Oxford college once invited an undergraduate to tea. In a letter, which, on first personal appearance to be an invitation to travel with him to Scarborough. Men who cannot read cannot write. It is a sad fact often written badly through their laziness, others, through affectation.

Handwriting is, of course, a rough and ready guide to character, though it is doubtful whether it is nearly so reliable an indication as many people pretend. The flowing cursive of our fathers has given place to the typescript of today. Who will regret the change? It is a loss, but a loss and slow; the other is rapid and more easily legible. And these we complain that it is a type-written communication is characteristic and without evidence of personality can only be acquainted with the regular and efficient work of a professional typeset. This is the day of the "one-finger" style, and the handwriting of letters in a word and a liberal use of "a's" are not without their touch of idiosyncrasy. There is, of course, a certain rigidity about the typescript. A handwritten letter is supposed to be a mark of respect to the recipient, though many a busy man would prefer the more easily legible typescript; and a typed letter is a personal matter, is no longer taken to be a sign of desecration, an ominous writing on the wall—Cape Times.

Keeper Not Overworked

Century-Old Prison Has Had Only Three Inmates

The jail from which no prisoner has escaped, the state prison of St. Charles, Mo., was opened recently to receive its first "guest" in nine years.

Arthur Baker, a postman, arrested on a charge of stealing his wife, is the third inmate in the century-long history of the jail. This miniature battle, little larger than a single-car garage, is a sturdy structure of stone. As a precaution against would-be jailbreakers, there is a barred-shape stone roof. Beneath the eaves, windows—too small to head-bang—give air and light.

Prison records have been rather neglected, for all that is known of the first inmate is that he was a sealer.

Prisoner No. 2 was a woman law-breaker whose name and offense are also unrecorded—a trifling crime," he said. She began to weep as soon as the door was closed. The sound of her sobbing was too much for the keeper and after about an hour he opened the door.

The prisoner, a female, sat on the doorstep during the week. Friends who, normally, would have come to see her on visiting days brought their stools and knitting and sat in a circle chatting to her, until she was finally released.

Soil Drift Damage

It is estimated that soil drift from one acre to the depth of one inch is equivalent to the removal of approximately 604 pounds of nitrogen, 155 pounds of phosphorus, and 5,280 pounds of potash. This amount of phosphorus alone is approximately equal to that removed from the soil in the production of 30 bushels of wheat.

A Japanese Custom

Solomon prayers for the souls of 100,000 bullfrogs sacrificed for experimental purposes in the past year were offered recently by high priests of the Bana Buddhist Temple, Tokyo. The idea was in keeping with the Buddhist belief all things, animate or inanimate, possess souls, or spiritual qualities.

It has been found that rays of the sun often are better in winter than they are in summer.

Marketing Of Hogs

Hog Grading Being Strained At Live Stock Fairs

The marketing of hogs on a dressed weight, rail-graded basis, commonly known as rail grading, is being stressed at many of the live stock fairs throughout Canada. Increased production, it is pointed out, requires an export market, and Canada's swine industry is dependent on the British market. The product of two or three million hogs, or any other proportion of output mutually agreed upon, is the Canadian quota for export to the British market, but Canada is falling short of this quota largely because a sufficient number of high quality hogs are not being produced in the Dominion. Canada has exported annually the product of one million hogs. The British market is available for more than twice that amount.

Competition in marketing Canadian live and animal products in the markets of the world is exceeding keen, and Canadian competitors, so far as bacon is concerned, place their faith in rail grading as the best method of securing quality. Now that Canada has taken up rail grading, satisfactory progress in this method of marketing has been registered throughout the Dominion. Rail grading is exactly what the words imply. For example, a farmer delivers his hogs to a number of identification when they are killed. The live hogs are first weighed, so that a fair down payment may be made. Then down payment runs about 75 per cent. of the butcher price. The hogs are then killed and weighed individually to the exact pound.

An inspector of the Live Stock Branch, Dominion Department of Agriculture, then grades the hogs in the killing floor, according to the standard set up by the Dominion Government, and the final payment to the farmer is made on the basis of that grade. The rail grades consist of three very different grades. The highest grade and the premiums and discounts paid are practically on the basis of it. It is a type-written communication is characteristic and without evidence of personality can only be acquainted with the regular and efficient work of a professional typeset. This is the day of the "one-finger" style, and the handwriting of letters in a word and a liberal use of "a's" are not without their touch of idiosyncrasy. There is, of course, a certain rigidity about the typescript. A handwritten letter is supposed to be a mark of respect to the recipient, though many a busy man would prefer the more easily legible typescript; and a typed letter is a personal matter, is no longer taken to be a sign of desecration, an ominous writing on the wall—Cape Times.

Aid Masked Industry

Huge Area Of Marshland Being Developed In Northern Manitoba

Over 120,000 acres of marsh land in the Saskatchewan river area of Manitoba, are being developed this summer as prime peatling grounds for the muskrat industry.

Employment between 70 and 65 men living in the area, the department of natural resources is continuing work on the project, which will provide levels will be stabilized and a rapid development of the muskrat population insured.

The prime minister calls for the huge area to be divided into trapping plots for residents of the area, each plot being surrounded by a fence of wire and a land agent. The area in question is bounded by the Saskatchewan river and the Saskatchewan river, which is an offshoot of the Saskatchewan, and joins the main stem of the river to the east of which the development is taking place.

D. E. Denmark, land surveyor, who had charge of the original survey made of the area, is in charge of the workers who are building dams, dykes, and canals. Last summer a dam 470 feet long was built at the outlet of Little Fish lake and a canal 2,500 feet long to divert waters of the Saskatchewan river into the area. Known as the Red Rock canal this inlet at the present time is being equipped with a control gate. The sum of \$40,000 has been made available in relief funds for the work.

Importance of the work in bringing back the muskrat population is indicated in a report submitted to Hon. J. B. McManis, minister of natural resources, which stated that low water some seasons in the marshes resulted in the marshes freezing to the bottom and the muskrats being killed—Winnipeg Free Press.

Victorian War Heroes

Victorian war-heroes will be decorated and will receive a sort of old age pension in Australia. The movement to provide the surviving heroes of the former imperial army with a pension and feed them for the rest of their lives from public funds, is probably connected with the revived military spirit in Central Europe.

Motor vehicles operating in China, including Manchukuo, now total nearly 50,000.

AS TRAGEDY REIGNED AFTER THE DOWNFALL OF BILBAO

Refugees awaiting evacuation

Tragedy and pathos characterized scenes in Bilbao, on the northern coast of Spain, as refugees awaited evacuation from the war-torn city as victorious French troops moved into the Basque capital. This striking photograph shows women and children at the railroad awaiting transportation out of the city which had remained inviolable for 70 years.

Uses Original Method

Expert Car And Plane Smasher Has Special Trick

"Capt." F. F. Franks, a Hollywood crash expert, who has been smashing airplanes and cars for 17 years, expects to die in some trifling ground accident. He visited Winnipeg recently after touring on United States fair circuits, crashing an airplane and half a dozen cars at each fair.

His plane crashes are by far the most spectacular stunts performed anywhere on this continent. Flying old "craters" in the last stages of deterioration, Franks takes them to 2,000 feet above the fair grounds and then dives and crashes nose-on into a house.

Franks' trick in crashing planes into houses is to fly the plane into the crash, instead of letting it dive into a crash on many planes do when they crash accidentally. When his wings are clipped off and the plane crashes through to hit the ground on the far side.

Sometimes fire breaks out and he has to be nimble to get out of the fire. Ground assistants with fire extinguishers help him get out.

Listeners Receive Shock

When B.C. Radio Play Overlapped Visual News Period

Radio listeners in England received a shock when they tuned into a scheduled news broadcast and heard an announcer declare: "We regret to announce that the condition of His Majesty King William IV. is no better." The prime minister, Mr. MacDonald, of the Archbishop of Canterbury have been notified. After the British Broadcasting Corporation had been alerted with calls asking about the health of King George VI. The explanation was given by the announcer, a play called "London Calling 1937" had overrun its time by four minutes, and that no royal death was imminent.

There is no standard size or weight for a bar of silver, but generally it approximates the size of an ordinary building brick.

Develop New Technique

Use Gun Oil For Flares In Bombing Practices

Army aviation experts in California have just found another use for motor oil in winning their battles.

During night bombardment maneuvers on Muroc Lake bombardment range the latter was lighted up by millions of flaming flares. The technique consisted in having an observation plane fly over the field before the bombing. It dropped flares composed of aluminum powder, barium nitrate, and motor oil, which gave a daylight intensity for a period of ten minutes during which the bombs were dropped.

Object Of All Nations

Trend Toward Self-Sufficiency Seen By Most Cereals

The "almost-universal determination to become self-sufficient" impressed Miss E. Cora Hind of Winnipeg more than anything else on a just-completed two-year trip around the world, in which she visited 71 countries.

Miss Hind, commercial and agricultural editor of the Winnipeg Free Press in an interview at Montreal said she believed this trend would go on "as long as the war clouds hang over Europe, no matter how economical it may be." It was evident not only in Europe, but also in South America.

To Start The Day

With words much in evidence on the living post station here, Captain Herbert Burns, Chicago, gives his 125 policemen to pluck every day before reporting for duty. Says Sergeant Michael Egan, the following conversation takes place:

"You've brought your weed?" "I have; indeed."

"O.K.—priced."

In mid-ocean, the gravitational pull of the moon draws the water between two and three feet away from the earth's surface.

Thief Is Caught

Chief Justice Traps Burglar By Fingerprint Method

When a barber with several convictions, broke into the home of Lord Howart, the head chief justice, at Tottenham, Hertfordshire, England, recently, he sat down at the typewriter and wrote an initial letter to the judge for leaving "no man's land."

A week later Lord Howart returned and summoned the police. The burglar had apparently worn gloves and he used the typewriter. They had removed them, leaving his fingerprints on the keys.

It was only a matter of routine for the anthropometric department of Scotland Yard to identify them and for the detectives to bring the hauler in. At the Hertfordshire assizes he was sent up for 18 months.

Old Temple Scrapped

Magnificent Building In Japan 'Nada For Old Metal

The magnificent temple of Himeji, in Japan, has been sold under the auctioneer's hammer to furnish scrap iron. The edifice, vacant since the government suppressed the Himeji temple for modern cities, was sold for \$150,000 to an Osaka scrap-metal merchant, who will dismantle it and sell the metal pieces 2,500 tons of scrap metal to the temple, holding in the hope they could raise the money framework for the navy for a substantial profit.

Belief Dies Not New

Gaia, Greece, the Roman title, who lived in 146 B.C., was first to produce farm roads for distributing grain to the poor. He supplied, at the expense of the Roman government, a hundred and a quarter a month at half price.

Runways passing across a dusty circus ring are hazardous to acrobatic riders, since horses frequently try to hurdle them.

The human population of the world is increasing at a rate of approximately 1 per cent. a year.

Colorful Names

Newfoundland Bigger Than Most Places In This Region

When Imperial Airways flying boat Clippers winged its way to Newfoundland after taking off from Ryegate, Ireland, on its first trans-Atlantic experimental flight, it reached Newfoundland first in colorful names. Appropriately, Ireland is on the Bay of Biscay. The vessel was named as a landing place in the wide mouth of St. Peter's River which flows into the long narrow island of Exploits. The bay, in turn, is an offshoot of Notre Dame Bay of the northwest coast of Newfoundland.

Belmont, 175 miles from St. John's by rail, is served by the Belmont Railway, a 20-mile spur connecting with the main St. John's Port and Basin line of the Newfoundland Government Railway near Grand Falls.

A direct flight would bring a plane to the island over the Bonaville section, with Bonaville, the main north and Sir Charles Hamilton Sound and Notre Dame Bay to the north. On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

Appears To Be Necessary

Nations Have Never Been Able To Agree On A Permanent Basis On Gander Lake, which will be used when preparations there are complete, is 50 miles from St. John's on the main railway line.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

On such a route the plane first would sight land between Bonaville's Point and Foggy Island on the most easterly section of Bonaville. The north.

Pony Shipped By Air

Animal Also Included Truck And Train In Long Journey

A pithball Shetland pony is quickly grazing at a new home in Brisbane, Queensland, apparently unimpaired by his 1,700-mile journey by rail and road from Bethanga, N.S.W. The pony, owned by T. J. McGill, sent the animal by automobile to the nearest railhead where it was placed in a crate and sent nearly 400 miles to Sydney, N.S.W. From Sydney the pony was shipped 1,600 miles by air to Charleston, Queensland. The last 400 miles was completed by motor truck.

Still A Question

"Where's the phone?" a customer asked David McIntosh, night club proprietor in Kingston, Ontario, who had just called out. "Where's the phone?" McIntosh asked police later. The instrument, pay box and all, had disappeared with the customer.

Animals as well as human beings, are subject to sunbathing.

CANADA'S OXFORD GROUP SENDS YOUTH DELEGATES TO ENGLAND

Twenty-six young men, drawn from sixteen points across Canada and representing every province in the Dominion, have sailed from Montreal to attend the Oxford Group Empire Youth demonstration at Birmingham, England. Our picture shows Premier W. L. Patterson of Saskatchewan shaking hands with the group as it prepared to leave Regina after completing a training course with two hundred Oxford Groupers. It is expected that 3,000 young men will converge on Birmingham from all parts of the Empire to attend this Oxford Group Youth demonstration.
